

Iklash Ahamed N

+91 8610338487 | iklashriz@gmail.com | Karaikudi, Tamil Nadu | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

B.Tech Information Technology student (Graduating May 2027) with a strong foundation in **Java**, **Data Structures & Algorithms**, **Object-Oriented Programming**, **Operating Systems**, **DBMS**, and **SQL** – having solved 140+ Java problems on LeetCode. Experienced building full-stack college and personal projects using **Node.js**, **React.js**, and modern web technologies. Strong problem-solving ability and a quick learner, eager to contribute and grow as a software engineer.

EDUCATION

Kalasalingam Academy of Research and Education

Tamil Nadu, India

B.Tech in Information Technology | CGPA: 8.02/10 | No Active Backlogs

Aug 2023 – May 2027

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Database Management Systems (DBMS)

Backend & APIs: Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Tools: Git, GitHub, Prisma, Vercel, Firebase

EXPERIENCE

Lead Developer

May 2025 – Present

Freelance Team (Hybix Group)

India

- Led a team of 3–5 developers to deliver 5+ full-stack client web applications on schedule, coordinating tasks and collaborating closely with clients and teammates
- Owned end-to-end development – requirements gathering, implementation, debugging, and deployment – for each client engagement
- Built RESTful backend APIs and standardized API contracts, reducing integration issues between frontend and backend; created a reusable component library and standardized Git/GitHub workflows to improve team development efficiency

Developer Intern

May 2025 – June 2025

DrobospaceX Automation Private Limited

India

- Built a full-stack applicant tracking platform (PostgreSQL, Express.js, React, Node.js), applying DBMS normalization principles to the schema
- Implemented OAuth 2.0 authentication and role-based access control (RBAC) for an admin dashboard supporting full CRUD operations
- Developed responsive UIs with Next.js and Three.js for 3D training modules on an AR/VR training platform
- Debugged and resolved integration issues in collaboration with the team, ensuring on-time delivery

PROJECTS

LinkED – Mentor Discovery Platform | *PERN Stack, PostgreSQL*

- Designed and implemented a skill-based matching algorithm to connect students with mentors on shared skill sets, improving relevance of discovered matches
- Designed a normalized PostgreSQL schema and wrote optimized SQL queries, applying core DBMS principles (normalization, indexing) for efficient search
- Built automated resume-generation and skill-assessment quiz features with a responsive React front end

Unitoids – AI Freelancing Platform | *Node.js, MongoDB, LangChain, FAISS*

- Designed a semantic matching system using LangChain and FAISS, replacing manual filtering and reducing manual job-matching effort
- Built a real-time query-processing pipeline with LLM integration for faster job-candidate matching
- Built and deployed a Node.js/MongoDB backend to Vercel, supporting concurrent user queries and API endpoints

BusApp – Smart Bus Alert System | *IoT, Firebase*

- Implemented a real-time proximity-alert algorithm that notifies students via seat vibration and push notification as the bus approaches
- Integrated real-time GPS location tracking with Firebase to deliver accurate live bus position updates

ACHIEVEMENTS

- Solved **140+ Data Structures & Algorithms problems in Java** on LeetCode, applying time/space complexity analysis to optimize solutions
- Built and presented a working prototype at **Smart India Hackathon (SIH)**, advancing beyond the initial selection round
- Placed **Top 3** in the Web Innovate competition – designed, built, and pitched a full-stack web product in a timed challenge
